## Ceramic Wall Tile

Where the colors  
of the landscape take shape  
between past and future

*Where the colors of the landscape  
take shape between past and future*

The oldest ceramic artifacts date back to 28,000 BC and around 9,000 BC there were traces of the first **ceramic** tiles. Today we call “ceramic” any of the distinct hard materials made by shaping and **firing** a nonmetallic mineral, such as clay, at a high temperature, like earthenware, porcelain, and brick. Over the last few centuries, Portugal and Italy have become countries of excellence for ceramic, and ceramic tiles in particular. In the mid-1900s the Italian market had become the largest in the world, thanks to production quality and design sophistication, and today it still represents a point of reference worldwide.

**Via Dell'Arte** was founded by **Luca Meneghini** back in **2006 in Florida**.

Luca gained valuable experience in the US ceramic market starting his career working for several years both on the Manufacture and Distribution side following four years in the architectural and builder division of Walker & Zanger for the Southeast Region.

Today, Via Dell'Arte employees 7 people, sells to over 150 Customers from large wholesalers to regional distributors and local importers across USA & Canada, and represents more than 20 Vendors from Italy, Portugal, Morocco, USA and Brazil.

**Via Dell'Arte** is an American company with an international spirit and we are passionate about the products we promote and sell
