Porcelain tile

Free your imagination
with a material
that lasts over time

*Free your imagination
with a material that lasts over time*

Porcelain is technically a **type of ceramic**, but it has some characteristics that make it unique. Porcelain tiles are very **resistant to shock, scratches, wear, stains** and **chemical agents**, making them suitable for multiple uses, both indoors and outdoors. Thanks also to a very **low water absorption** rate (less than 0.5%), porcelain tiles are one of the most hygienic materials on the market as they can be easily disinfected. Furthermore, from a stylistic point of view they offer countless solutions, coming in a **wide range of colors**, looks, and textures from which to choose, like marble, wood, stone, concrete effects and much more.

Via Dell'Arte was founded by **Luca Meneghini** back in **2006 in Florida**.

Luca gained valuable experience in the US ceramic market starting his career working for several years both on the Manufacture and Distribution side following four years in the architectural and builder division of Walker & Zanger for the Southeast Region.

Today, Via Dell'Arte employees 7 people, sells to over 150 Customers from large wholesalers to regional distributors and local importers across USA & Canada, and represents more than 20 Vendors from Italy, Portugal, Morocco, USA and Brazil.

Via Dell'Arte is an American company with an international spirit and we are passionate about the products we promote and sell
